

YOU CAN'T COMPLICATE A NAPKIN!

...keeping insurance applications simple

Agencies face many frustrations with small accounts. The application for a quote shouldn't be one of them. Our small accounts team is happy to quote off very little up front information. The team is trained to research the questions needed via third party sources and get the bindable quote approved.

- ◆ No ACORDS
- ◆ No Supplemental
- ◆ No Loss Runs (if no losses in 5 years)

Really, we've quoted off a napkin or a phone call. Sometimes a simple "thumbnail sketch" via e-mail is fine too. Our job is to make quick quotes easy—one business day turnaround, one hour if needed. Our small accounts carriers are all AM Best rated A VIII ("A" 8) or above and use occurrence based forms. What is a small account? Typically one under \$1.2M in sales paying less than \$10k in premiums.

With agencies barely able to afford the time to input applications or complete a litany of forms, why not let us handle this for you. We still pay 15%+ commission too. Lastly, most of our Builder's Risk options require nothing more than a sketch either. Let's make this easy while you make money.
